

Rig Measurements for calculation of T(H)CF

Sail dimensions:

Mainsail, mizzen and main and mizzen topsails, and schooners' foresails and fore-topsails, are measured as the actual sail dimensions, not the spar lengths.

Headsails are **not** measured – it is the size of the foretriangle that is measured.

Foretriangle:

I is measured from deck to the top of the highest headsail halyard sheave (for jib topsail if one can be flown). **J** is measured from the foreside of the mast to the eye of the fitting which sets the tack of the furthest forward headsail, or to the sheave of the jib outhaul at the end of the bowsprit.

Off-wind sails (spinnakers) are not measured but **must have the leeward clew attached to the centre-line of the boat.**

Sail dimensions:

	Lowers			Topsails	
	Luff (H)	Head (G)	Foot(B)	Luff (TH)	Chord (TI)
Foremast:	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Mainmast:	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Mizzen:	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

Foretriangle:

Height (I): Length (J):

T(H)CF: **Source:** **OGA Class:**

History: if converted, rebuilds, published references, drawings or plans available; any fittings or novel arrangements of note, anything of interest to others:

Please continue on a separate sheet if necessary

The above information is correct to the best of my/our belief and I/we will accept any race results based on the handicap calculated from them. I understand that no data about me/us and my/our connection with the boat, apart from owners' names, will be published outside the OGA.
